Summary

Computer Science graduate passionate about working in different areas of full stack technologies. A team player, having worked with a group of students on a senior design project from start to completion. Experience using and researching new technologies to learn and use on projects.

Education

California State University, Northridge

May 2021

Bachelor of Science, Computer Science

- Related Coursework: Web Engineering, Human Computer Interaction, Computer Networks

Projects

Portfolio Website - <https://alangarc1a.github.io/PortfolioWebsite/>

January 2021 – present

- Designed a mockup using Sketch and translate that mockup into a responsive website.
- Implemented the website using HTML5, CSS3, Sass, JavaScript, and JavaScript libraries.
- Optimize, maintain, and fix any issues that the website will create on different browsers and devices.

GameHub - <https://github.com/AlanGarc1a/GameHub>

February 2021 - present

- Developed the user interface using React.js and Material UI so users can have a friendly and easy experience.
- Implemented backend services using Express.js and Node.js to handle different HTTP requests.
- Created schemas using Mongoose.js for an easier way to map and retrieve information from MongoDB and display it to the user.
- Perform unit tests using react testing library and Jest.

Cloud Systems - <https://github.com/AlanGarc1a/CloudSystems>

March 2021 – present

- Designed and implemented the front end by coding in HTML5, CSS3, Sass, and JavaScript libraries.
- Implemented a Sass mixin to write a responsive website that fits all media types.
- Committed code changes and implement new designs and features using git.
- Fix any issues or bugs that will show up on different browsers and devices.

Skills

Languages: Java, JavaScript (ES5+)

Web Development: HTML5, CSS3, Sass, JavaScript (ES5+), React.js, Node.js, Restful API, Bootstrap

Databases: NoSQL (MongoDB)

Other: Git, Agile
